

Tocktify — CONTENT PLAYBOOK

Tocktify Content Playbook

Somali-first, English-subtitled. Two TikTok posts per day (1:00pm and 8:30pm EAT — the second slot catches Somalia prime time AND US-diaspora midday). Everything cross-posted to YouTube Shorts. One long YouTube upload per week (documentary part, Fridays 7pm EAT).

1. Content pillars and weekly mix (14 TikToks/week)

Pillar	/wk	What it is
Seller stories	4	Ahmed (Banana Bully) & Sahel Drops day-in-the-life, order packing, first-order reactions; later, every new Founding 100 seller's "store goes live" moment
The enemy is the DM	3	Relatable pain content: payment-screenshot chaos, lost orders, "sariirta warbaahinta" selling. Skits work — Somali TikTok loves comedy
Education / tutorials	3	60-sec how-tos: upload a product, create a tracking link, get paid in 24h; plus "how to get a business license" series (from the onboarding SOP)
Building in public / founder	2	CEO updates: "Week 3: 47 sellers onboarded", behind the scenes of the team, answering hard questions (fees, trust, payouts)
Suuq Live clips	2-3	Best moments from Thursday's live

Rules that compound:

- **Reply to every comment; turn the best questions into video replies** — TikTok's video-reply feature is the cheapest content ideation engine.
- Every video ends with ONE CTA only: link in bio → waitlist. Founding 100 videos CTA → application.
- Hook in the first 1.5 seconds, in Somali, text on screen.
- Caption format: Somali hook + English line + 3-5 hashtags (#somalitoktok #somalibusiness #ganacsi #xamar #soomaaliya + city tags #minneapolis #eastleigh when targeting diaspora).

2. Ten ready-to-shoot scripts

S1 — "Screenshot-kii lacagta" (the payment screenshot)

(Enemy-of-DM, skit) Hook: "Walaal, screenshot-ka lacagta ii soo dir..." — 47 times a day? Seller scrolling endless WhatsApp payment screenshots, losing one, customer angry. Cut: same seller opens Tocktify dashboard — every order, every payment, automatically. "Joojiy ganacsiga DM-ka. Tocktify.com — link bio."

S2 — Ahmed's 6am cake order (Seller story) Hook: Mid aya

Mareykanka ka soo dalbaday keeg — habeenkii. ("Someone in America ordered a cake — at night.") Ahmed wakes to an order notification placed from Minneapolis, bakes it, delivers to the buyer's family in Mogadishu, films the family receiving it. CTA: "Qof aad jeceshahay keeg ugu dir — tocktify.com." — This is the diaspora-wedge video; boost hard in Minneapolis/London/Toronto.

S3 — "24 saac kadib lacagtaada" (Education) Hook: Goorma ayaad

lacagtaada heshaa? 24 saac. Mar walba. Screen-record the payout flow: sale happens → countdown → EVC Plus message arrives on the seller's phone. Show the actual SMS. Trust content — in this market, seeing the payout SMS is worth 100 testimonials.

S4 — Founding 100 announcement (Founder, boost this) Hook: 100

qof oo kaliya. Waxaan kuu samaynaynaa wax aysan Shopify abid kuu samayn karin. ("Only 100 people. We'll do for you what Shopify never

could.") CEO to camera: we get you the license, the Hormuud merchant account, the store, the payouts — done with you, founding price locked. CTA: apply, link in bio.

S5 — "Maxaad iibin lahayd?" giveaway (*UGC engine*) Hook: *Sanad bilaash ah oo Tocktify — hal su'aal.* ("A free year of Tocktify — one question.") Stitch/duet this video telling us what you'd sell online; best answer wins a free year (list value 300, *cashcost* 0). Pin it; boost it; it generates an audience-map of what people want to sell.

S6 — License myth-buster (*Education series, 3 parts*) Hook: *"Ruqsad ganacsi ma leedahay?" — Ha ka baqin.* ("Do you have a business license?" — Don't fear it.") Employee C walks through exactly what a license costs, how long it takes, what Tocktify handles for you. The licensing fear is the silent objection — name it on camera.

S7 — Sahel Drops restock rush (*Seller story*) Time-lapse of Sahel packing grocery orders with order-count overlay, *"Maanta: 23 dalab"* style. No revenue numbers (per their preference) — order counts and busy hands tell the story.

S8 — "Dukaan 5 daqiqo gudahood" (a store in 5 minutes) (*Education / demo-store launch*) Screen recording, phone-only: sign up → name your store → upload one product → share link to WhatsApp status. Ends: *"Bilaash ku tijaabi — demo store. Lacag-qaadista markaad diyaar tahay."* (Try free in demo mode; activate payments when ready.)

S9 — Diaspora call-out (*Diaspora, English-led*) Hook: *"Your mom in Xamar runs a business from her phone. She just can't take payments online. Until now."* English with Somali subs, boost only in diaspora cities. CTA: *"Tag her. Or set up her store yourself — tocktify.com."* Tag-a-relative CTAs have built-in virality.

S10 — Weekly scoreboard (*Building in public*) Every Monday: CEO, 30 seconds, whiteboard: *"Toddobaadkan: X seller cusub, Y dalab, Z magaalo."* (This week: X new sellers, Y orders, Z cities.) Running public momentum makes followers feel like investors.

3. YouTube plan

- **Fridays 7pm EAT:** documentary parts 2, 3, 4 on consecutive Fridays (Somali + English versions like part 1). Boost each \$20 to East Africa + diaspora geos. After part 4, the Friday slot becomes "Founding 100 stories" — 5–8 min mini-docs of new sellers (the documentary format you already proved, industrialized).
- **Shorts daily** (repurposed TikToks — re-export without TikTok watermark).
- **Tutorials playlist** ("Tocktify Academy"): the S6/S8-style videos in full length; this becomes your onboarding manual, cutting Employee C's support load.
- Subscriber boosts: fine to continue at trickle spend, but optimize for East Africa + diaspora; non-Somali East African subs are future-market seeding (Kenya next), not waste — just don't pay much for them yet.

4. Suuq Live (every Thursday 8:30pm EAT)

Rundown: 5 min welcome + week's numbers → 10 min live demo / new feature → 20 min guest seller interview → 20 min open Q&A from comments → 5 min CTA (waitlist / Founding 100). Clip 3–5 shorts next morning. Guests weeks 1–2: Ahmed, Sahel; week 3+: newest Founding 100 sellers.

5. Boost playbook (TikTok)

1. Post organic. Wait 24–48h.
2. Boost only the top ⅓ by completion rate + comments — \$1–2/day × 6–7 days.
3. Always-boost list regardless of organic performance: S2 (diaspora wedge), S4 (Founding 100), S5 (giveaway), each documentary trailer.
4. Two audience buckets per boosted video where possible: Somalia-reachable
 - one diaspora city. Compare cost-per-waitlist-signup, not views.
5. Log every boost in a sheet: video, spend, views, profile visits, link clicks, signups. Monday review; kill >0.50/signup, scale<0.20.

6. Zero-cost distribution (do not skip)

- **WhatsApp statuses** — every team member, Ahmed, Sahel post store links and clips to status; in Somalia WhatsApp status is a top-3 channel.
- **Facebook groups** — Somali buy/sell groups (Mogadishu, Hargeisa, diaspora city groups) are huge; share seller stories (not ads) + the free guide. 3 posts/week, value-first.
- **Somali business TikTokers/YouTubers** — offer free year + revenue share via referral link instead of cash. 5 outreaches/week. Micro (5–50K followers) converts better than celebrities and costs nothing up front.
- **Duet/stitch** trending Somali small-business content daily — free distribution on other people's reach.
